DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group I, claims 1-33, drawn to a reduced glare, conductive coated panel, classified in class 428, subclass 426.
 - II. Group II, claims 34-50, drawn to a method of making a reduced glare, conductive coated panel, classified in class 427, subclass 169.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by sputtering thin film coatings onto the substrate rather than using the claimed wet deposition method.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Donald S. Gardner on 7/8/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR

Art Unit: 1775

1.143). Upon election of the product claims the examiner of record will examine the claims.

Upon election of the process claims, the application will be transferred.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew T Piziali whose telephone number is (703) 306-0145. The examiner can normally be reached on Monday-Friday (8:00-4:30).
